Barrick Announces Dividend Increase

TORONTO – Barrick Gold Corporation (NYSE:ABX)(TSX:ABX) (“Barrick” or the “Company”) today announced the Board of Directors has approved an increase in the Company’s quarterly dividend from $0.02 cents per share to $0.03 per share.

Our capital allocation goals over the past two years have centered on restoring our balance sheet to withstand gold price volatility, investing to improve the quality of our asset base, and rewarding our shareholders with a reliable dividend.

Since the end of 2014, we have reduced our total debt by 40 percent, and in 2017 we are increasing our investments in exploration and projects that have the potential to grow free cash flow per share over the long term. Reflecting this progress, we are increasing returns to our owners through an increase in our quarterly dividend.

The quarterly dividend is payable on March 15, 2017, to shareholders of record at the close of business on February 28, 2017.¹

¹ The declaration and payment of dividends is at the discretion of the Board of Directors, and will depend on the Company’s financial results, cash requirements, future prospects, and other factors deemed relevant by the Board.

CAUTIONARY STATEMENT ON FORWARD-LOOKING INFORMATION

Certain information contained in this press release, including any information as to our strategy, projects, plans, or future financial or operating performance, constitutes “forward-looking statements”. All statements, other than statements of historical fact, are forward-looking statements. The word “potential” and similar expressions identify forward-looking statements. In particular, this press release contains forward-looking statements including, without limitation, with respect to cash flow forecasts and projected capital, operating, and exploration expenditures. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by the Company as at the date of this press release in light of management’s experience and perception of current conditions and expected developments, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements, and undue reliance should not be placed on such statements and information. Such factors include, but are not limited to: fluctuations in the spot and forward price of gold, copper, or certain other commodities (such as silver, diesel fuel, natural gas, and electricity); failure to comply with environmental and health and safety laws and regulations; timing of receipt of, or failure to comply with, necessary permits and approvals; the impact of global liquidity and credit availability on the timing of cash flows and the values of assets and liabilities based on projected future cash flows; fluctuations in the currency markets; changes in U.S. dollar interest rates; changes in national and local government legislation, taxation, controls or regulations, and/or changes in the administration of laws, policies, and practices, expropriation or nationalization of property and political or economic developments in Canada, the United States, and other jurisdictions in which the Company does or may carry on business in the future; damage to the Company’s reputation due to the actual or perceived occurrence of any number of events, including negative publicity with respect to the Company’s handling of environmental matters or dealings with community groups, whether true or not; risk of loss due to acts of war, terrorism, sabotage, and civil disturbances; litigation; contests over title to properties, particularly title to undeveloped properties, or over access to water, power and other required infrastructure; business opportunities that may be presented to, or pursued by, the Company; our ability to successfully integrate acquisitions or complete divestitures; risks associated with working with partners in jointly controlled assets; employee relations including loss of key employees; increased costs and physical risks, including extreme weather events and resource shortage, related to climate change; availability and increased costs associated with mining inputs and labor. In addition, there are risks and hazards associated with the business of mineral exploration, development and mining, including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, flooding and gold bullion, copper cathode or gold or copper concentrate losses (and the risk of inadequate insurance, or inability to obtain insurance, to cover these risks).

Many of these uncertainties and contingencies can affect our actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, us. Readers are cautioned that forward-looking statements are not guarantees of future performance. All of the forward-looking statements made in this press release are qualified by these cautionary statements. Specific reference is made to the most recent Form 40-F/Annual Information Form on file with the SEC and
Canadian provincial securities regulatory authorities for a more detailed discussion of some of the factors underlying forward-looking statements and the risks that may affect Barrick's ability to achieve the expectations set forth in the forward looking statements contained in this press release.

The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable law.
